Barco establishes reference site in Belgian hospital

SNM SMARTBRIEF | 04/30/2009

Medical-imaging specialist Barco has established a customer-reference site at the General Hospital Group AZ Groeninge in Belgium. The move will allow Barco to expand its experience in working with the clinical end-user community. The site will use Barco's Coronis Fusion 6MP DL display system to read images from various modalities, including PET/CT, MRI and CT. [DOTMed.com](#) (04/29)
