Instructions for the production and delivery of the semen sample

Making an appointment

ALWAYS make an appointment with the lab for the 877, 878, and 879 analyses (see above). Call the lab at 056/63.42.00. If you are unable to attend your appointment on time, please notify us by calling the same number.

For analyses 875, 8700, and 880 (see above), you do not need an appointment. Prepare the sample according to the instructions below and bring it in during blood collection hours (AZ Groeninge: Monday to Friday from 7:00 AM to 8:00 PM / Sint-Jozefskliniek IZEGEM: Monday to Friday from 8:00 AM to 6:00 PM).

Sample Preparation Instructions

1. Observe a sexual abstinence period of 2 to 7 days.
2. Wash the genitals with soap and water, rinse well with water and dry with a clean cloth.
3. Urinate before ejaculation
4. Produce the sample through masturbation (no condom, lubricant, or vaginal contact).
5. Use the sterile container provided by your doctor, close it tightly, and keep the sample on your body (e.g., against your abdomen) to protect it from cooling.
6. For analysis 877, 878 and 879: make sure you can deliver the sample to the hospital within the hour.
7. For sample preparation at the hospital: please ensure you arrive at least 15 minutes before your appointment.

Sample delivery

1. Please bring this form and your identity card
2. Register at the registration desk at the hospital reception and select "lab/blood collection/donation." If you already have the sample, select "donate sample." If not, select "create sperm sample."
3. Follow the route indicated on the document that is printed
